At this point, we have done know monitoring of the wetlands areas. We are doing a removal action which eliminates the immient and substantial endangerment to human health and the environment which entails only the removal of the potential source materials which could impact these areas. At this point, we have seen no direct impact to these areas. Since this site will not rank on the NPL then it is unlikely that we will pursue such an in depth evaluation of the wetland areas. Sorry, I couldn't help.

 Subject: data for Falcon Refinery

09/09/2003 11:33 AM

Mr. Moore,
 My name is (b) (6) and I am a graduate student at the University of Florida. I am in the process of gathering information and data for my thesis project. I am interested in looking at any data you might have in reference to any monitoring that may have been done on the palustrine/estuarine wetlands at the Falcon Refinery in Texas. If there is someone else I should contact please let me know. Your help is much appreciated.

Thank You,

(b) (6)
